

Cleaning and maintenance of your acrylic product

With a little care your acrylic products will remain clear and scratch-free.

- ▶ Mix a solution of 80 ml laundry detergent with warm water in a 5 l bucket. Stir with our hand to completely mix the soap and water.
- ▶ Wipe the acrylic surface with a clean microfiber cloth that has been immersed in the bucket. Apply pressure to stubborn stains like grease or oil.
- ▶ Use a chamois leather or soft dry cloth to dry your acrylic.
- ▶ If the surface is static, use 'BURNUS' anti-static cleaner

- ▶ Do not use a sponge or dry cloth until the acrylic has been rinsed with water.
- ▶ Under no circumstances use abrasive and corrosive substances such as: alcohol, turpentine, dry-cleaning naphtha, dishwasher detergents or solvents.
- ▶ Do not use a high-pressure washer for cleaning your acrylic.
